Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 April 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/18/2008 has been entered.

2. The Amendment and IDS filed by Applicant on 04/18/2008 and 05/06/2008, respectively have been entered.

Response to Arguments

3. Applicant's arguments filed on 04/18/2008 have been fully considered and they are found unpersuasive.

4. The rejection of claims 1-4 and 6-9 under 35 U.S.C. 102(b) as being anticipated by Krom, U.S. Patent No. 6,437,450 (hereinafter "Krom") is withdrawn.

Art Unit: 1796

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The Applicant recites the functional group is polar, which is broader than the Markush functional group recited in claim 1.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

((e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1796

8. Claim 1-6, 8-9 and 24-38 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang et al., U.S. Patent No. 7,238,751 (hereinafter "Wang"). Wang teaches a multilayer nanoparticle comprising a styrene based inner layer, an amine functionalized diene based rubber outer layer wherein the nanoparticle has a diameter of less than 100 nm. See Wang, Abstract; col. 8, lines 30-45. Wang teaches a monodisperse nanoparticle, which can be crosslinked, where the monomer selection includes butadiene, styrene and hydrogenating of diene monomer. See Wang, col. 3, line 15, col. 4, line 31 through col. 5, line 4, col. 6, line 50 through col. 8, line 45. Wang also teaches a nanoparticle prepare by a general process that comprises forming a diblock, adding a crosslinking agent and functionalized group through an initiator as covered by present claims 24-30. See Wang col. 2, line 60 through col. 8, line 45. Furthermore, Wang teaches the use aluminum (metal) hydrate as filler and Wang teaches the use of tin functionalized nanoparticle in tire compositions. See Wang, col. 12, lines 2 and 39-40.

9. The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35

Art Unit: 1796

U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert D. Harlan whose telephone number is (571) 272-1102. The examiner can normally be reached on Mon-Thu, 10 AM - 8 PM.

11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David W. Wu can be reached on (571) 273-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

12. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through
